

Name of school:-Jagannath Bidyapitha, Kharchuli

Name of Head master:-Pramod Jena

Total strength of this school:-

Name of Science teacher:-

Total number of experiment shared with students:-

There is only one high school in Gandanali Panchayat which is Jagannath Vidya Pitha, Kharchuli. The school was always an outstanding school, teaches and student are very proud to be part of it. Teachers are always very ambitious about the future of the school and its students. This mentality of teachers helped us a lot, time passed by and ILP started a new project called “science experiment” project. In this project, Science kit was given to 42 schools in Hindol block, this kit contains all the needed equipments to conduct an experiment. This step of ILP was to make learning a little bit more exciting and fun. Mr. Gaurachandra Jena is the head master as well as the science teacher of the school, he conducts every experiment using the Science manual book provided by the ILP and regularly shares its photos and videos to the Science Teacher Group created by Ganeswar Club on what’s App. The science kit given by the ILP has helped him a lot in doing experiments in school. About 80-90 experiments have done by using science kit; he has already done all these experiments, apart from this he has done 26 more experiments in school. Children's fundamentals and concepts become clear by doing experiments every day. Students are now very much interested in doing experiments by themselves, the demands their teaches to do new experiment, the child's interest in science lessons has also increased. All the children and teachers thanked ILP for giving science kit.
